PROFILE

Malawian technology professional and full-stack software developer with a First-Class Honours degree in Computing, currently gaining structured cross-functional exposure to technology, product, and business as a Management Trainee at NICO Group. Experienced across web, mobile, and infrastructure development, with hands-on work in public sector financial systems and client hosting/web solutions. Currently pursuing a Master of Science in Financial Engineering (MScFE) to build expertise at the intersection of technology, data, and finance, with a growing focus on fintech and scalable digital financial services.

PROFESSIONAL EXPERIENCE

Management Trainee — NICO Technologies

11/2025 – Present
Blantyre, Malawi

NICO GROUP 📁

Selected as one of 33 trainees from over 3,000 applicants for NICO Group's flagship 24-month Management Trainee Programme; one of only 2 trainees placed within NICO Technologies, gaining structured exposure to how technology drives strategy and digital transformation across the Group.

- Undergoing structured technical and leadership training as part of a 24-month development programme
- Completing job rotations across technology, business, project management, operations, and product functions within the Group
- Contributing to targeted project assignments supporting digital transformation initiatives
- Working toward professional certification as part of the programme's development track
- Collaborating cross-functionally across NICO Group's operating companies (banking, insurance, asset management, ICT)

Web Developer & Hosting Solutions Specialist (Consultant — Parttime)

03/2025 – present
Remote, Malawi

Arise Hosting Limited 📁

Deliver web development and hosting infrastructure services for clients, covering the full lifecycle from custom development to domain, server, and email administration.

- Design and develop websites and web applications for clients
- Register and configure domain names, and manage DNS records
- Set up and administer hosting accounts and cPanel environments
- Configure and manage business email accounts (SMTP/IMAP, webmail)
- Provide technical support for hosting, domain, and email-related client issues

Software Developer/ICT Officer (internship)

08/2024 – 09/2025
Lilongwe, Malawi

Department of Accountant General

Joined the department on an industrial internship soon after completing my degree, contributing to software development, IT support, and infrastructure operations for public sector financial systems.

- Developed and maintained software solutions supporting departmental operations
- Provided IT support across departmental systems and end-user devices
- Configured and managed servers and network infrastructure
- Implemented network security measures to protect sensitive financial systems

- Installed and configured the IFMIS (SAP) system for public sector financial management
- Supported public sector technology operations and system reliability

SELECTED PROJECTS

Malawi Nest — Travel Platform

A platform to easily identify and find local accommodations and attractions across Malawi, making it simpler to discover where to stay and what to see.

Travel · Accommodation · Maps · Listings · Web App

Zonse App — Mobile · Android & iOS

An expense tracking and budgeting app for Android and iOS, helping users easily track spending by day, week, or month.

Budgeting · Expense Tracking · Personal Finance · Mobile App

Pashoyo — Ticketing Platform

A ticketing platform that digitises the buying and selling of tickets — from shows and sports to bus tickets and more

E-Ticketing · Events · Payments · Booking · Web App

Employee Loan Management System — Internal System

A loan management system built to handle employee loans for a private company; the organisation is not named for confidentiality.

Loan Management · Finance · Employee Portal · Workflow · Web App

Olw Planet Shop — Ecommerce

An ecommerce platform for Olw Planet Urban Wear. Supports Malawi Kwacha payments via PayChangu, plus PayPal and Stripe for international purchases.

Ecommerce · Online Store · Payments · Product Management · Web App

Shannon Healthcare — Healthcare (UK)

A web-based system helping UK care providers navigate CQC regulations with confidence — from registration to inspections — so they can focus on delivering exceptional care.

Healthcare · Compliance · CQC · Care Providers · Web App
